

Inteno expands with new software company

Inteno Group AB proudly announces the establishment of a new member in the Inteno group of companies, iopsys software solutions AB.

The objective of iopsys software solutions AB is to drive the development and sales of Inteno Group's enterprise OpenWrt based software platform for gateways, iopsys. To further associate it to iopsys background and origin, the operating system will be renamed iopsysWrt.

"By establishing iopsys software solutions we show our commitment to further strengthening the position of iopsysWrt as the premier operating system in the gateway industry" says Inteno Group CEO Conny Franzén.

"I am glad to announce that Joakim Bennerholt, former VP-sales of Inteno, takes over the responsibility as CEO of iopsys software solutions AB. Joakim has been involved since we started the development of iopsys and has the right background and qualifications", continues Conny.

"We see the establishment of iopsys software solutions AB as an important milestone in our quest to support the gateway industry. iopsysWrt is the leading gateway software offering for telecom operators looking for a future proof alternative allowing them to quickly develop and launch new services such as enhanced WiFi performance and coverage as well as IoT adaptations. Having a flexible and open software platform in the gateway gives our customers a competitive advantage", says iopsys software solution CEO Joakim Bennerholt.

"Inteno is an important member of prpl with their engineers making key contributions to our open source projects including prplWrt. Inteno's move to elevate iopsys into a separate company shows their clear commitment towards prpl, the OpenWrt community and the gateway industry," says prpl

Inteno Group AB

Stensättravägen 13, SE-127 39 Skärholmen, Sweden
